Health Care Financing Program Statistics

The Health Care Financing Administration was established to combine health financing and quality assurance programs into a single agency. HCFA is responsible for the Medicare program, Federal participation in the Medicaid program, the Professional Standards Review Organization program, and a variety of other health care quality assurance programs.

The mission of the Health Care Financing Administration is to promote the timely delivery of appropriate, quality health care to its beneficiaries—approximately 47 million of the nation's aged, disabled, and poor. The Agency must also ensure that program beneficiaries are aware of the services for which they are eligible, that those services are accessible and of high quality, and that Agency policies and actions promote efficiency and quality within the total health care delivery system.

HCFA's Office of Research, Demonstrations, and Statistics (ORDS) conducts studies and projects that demonstrate and evaluate optional reimbursement, coverage, eligibility, and management alternatives to the present Federal programs. ORDS also assesses the impact of HCFA programs on health care costs, program expenditures, beneficiary access to services, health care providers, and the health care industry. In addition, ORDS monitors national health care expenditures and prices and provides actuarial analyses on the costs of current HCFA programs as well as the impact of possible legislative or administrative changes in the programs.

Medicare ***Program Statistics*** present detailed reports on Medicare enrollment, providers, and the use of reimbursement for covered services. Medicare enrollment data report the number of persons insured under Part A and Part B of the Medicare program by age, race, sex, and place of residence. Provider statistics consist of information on the number, distribution, and characteristics of hospitals, skilled nursing facilities, home health agencies, and independent laboratories certified to furnish and receive payment for covered health services to Medicare beneficiaries.

Foreword

This report continues the release of Medicare enrollment figures begun with the data for 1966. It is one of a series prepared in the Office of Research, Judith Lave, Director, to provide a description of the number, distribution, and characteristics of the beneficiaries of the Medicare and Medicaid programs administered by the Health Care Financing Administration.

The number of aged persons insured under the two parts of the Medicare program are shown primarily for July 1, 1977, by age, race, sex, and place of residence. Monthly terminations and new enrollments are also shown. Selected data are included for enrollment since the program began. The figures provide the population base for rates of utilization of medical services covered under the program that are published in other reports of the Medicare series.

This report also presents information on the characteristics and geographic distribution of disability beneficiaries under age 65 covered by Medicare. The Social Security Amendments of 1972 (Public Law 92-603) extended Medicare coverage to the disabled effective July 1, 1973.

The text analysis and data presentation of this report are the responsibility of James M. Hatten, now with the Division of Information Analysis, Office of Statistics and Data Management, with assistance from Kathryn D. Barrett for computation and verification of data. This report was written in the Division of Beneficiary Studies, Allen Dobson, Director, under the supervision of Herbert A. Silverman, Chief, Program Statistics Branch.

Important contributions for the tabulation and presentation of the statistical content were made by Robert Dickerson and Robert J. Butler. Computer services were provided by the Division of Health Insurance Statistical Data, Bureau of Data Processing, Social Security Administration. The general tables were produced by the System for Automated Tabular Composition, a computer system of the Social Security Administration headquarters. They were photo typeset on Linotron equipment at the Government Printing Office.

Introduction

Purpose

This report presents data on the characteristics of the aged and disabled population in the Medicare program during 1977. Changes in enrollment of the aged since the start of the program on July 1, 1966, are discussed by selected characteristics. The general tables, which cover 1976 and 1977, present separate data for aged and disabled beneficiaries by type of coverage, age, race, sex, and State of residence. In addition, Table A shows combined aged and disabled enrollment by type of entitlement and State of residence.

Included with all disability beneficiaries are persons eligible solely because of End-Stage Renal Disease. The counts of beneficiaries are as of July 1, of the year shown. Also included are tables showing enrollment by month and the total number of persons enrolled at any time during the year.

Summary of Findings

The findings of this report are presented separately for aged and disabled beneficiaries.

Aged

Enrollment Growth, 1966-1977

Persons 65 years and over enrolled in the hospital insurance (HI) program increased from 19.1 million in 1966 to 23.5 million in 1977, a total increase of 23 percent and an average annual increase of 1.9 percent.

The enrollment of the aged under supplementary medical insurance (SMI) showed a slightly larger increase—30 percent—going from 17.7 million in 1966 to 23.0 million in 1977, with an average annual increase of 2.4 percent.

CHARACTERISTICS OF AGED BENEFICIARIES ENROLLED FOR HI, 1966-1977

Entitlement

Between 1966 and 1977 the proportion of HI beneficiaries entitled by virtue of eligibility for social security benefits increased from 84 to 94 percent. During this period about 4 percent were entitled under railroad retirement benefits. The largest change was in beneficiaries entitled under special transitional provisions (see "Eligibility," Appendix B). By 1977, only about 3 percent of the HI beneficiaries were entitled under these provisions.

Age, Sex, Race, and Residence

In 1977, beneficiaries aged 75 years or older constituted 40.5 percent of the total enrollment (compared to 37.2 percent in 1966). Beneficiaries 85 years and over constituted 8.9 percent of the enrollment (up from 6.2 percent in 1966).

In 1977, 59.4 percent of the beneficiaries were women, an increase from 57.4 percent in 1966. The increased proportion of women among HI beneficiaries reflects greater longevity. Between 1966 and 1977, the proportion of women aged 75 years and over increased from 39 to 44 percent compared to an increase from 35 to 36 percent for men.

Enrollment of minorities among HI beneficiaries increased from 7.5 percent in 1966 to 8.5 percent in 1977. This represents an average annual increase of 2.9 percent compared to 1.9 percent for whites.

Between 1966 and 1977, the South replaced the North Central States as the region where the largest percentage of HI beneficiaries resided. The proportion living in the South increased from 28.8 percent in 1966 to 31.7 percent in 1977, while the North Central States declined from 29.5 to 27.3 percent. The Northeast decreased from 26.7 to 24.6 percent, and the West increased from 15.0 to 16.3 percent.

Between 1966 and 1977 Florida showed the largest increase in the number of HI beneficiaries (583,000), accounting for almost one-third of the increase in the South.

About 55 percent of minority HI beneficiaries lived in the South in 1977.

CHARACTERISTICS OF AGED HI BENEFICIARIES ENROLLED FOR SMI, 1966-1977

Age, Race, and Sex

Because of the large percentage of HI beneficiaries enrolled for SMI (96.4 percent in 1977) there is little difference between HI and SMI beneficiaries by age, race, and sex.

A higher percentage of white HI beneficiaries than other races enroll for SMI—a difference that has existed since 1966, but which has narrowed somewhat. In 1966, respective percentages were 93.2 and 86.1. In 1977, the percentages were 96.8 for whites and 92.5 for other races.

Beneficiaries Enrolled for SMI Only

In 1977, about 364,000 persons lacking the required work credits for HI eligibility elected to enroll for SMI.

State Buy-Ins

In 1977, SMI premiums for about 2.5 million aged SMI beneficiaries were paid by States and other governmental jurisdictions because these beneficiaries received public assistance or qualified for medical assistance programs. Since 1970, this group of beneficiaries has represented about 11 percent of the total SMI enrollment.

Disabled

Enrollment Growth, 1973-1977

Disabled beneficiaries enrolled in HI increased from 1.7 to 2.6 million between 1973 and 1977. During the same period, SMI enrollment increased from 1.6 to 2.4 million. In both cases, the total increase was 51 percent and the average annual increase was 10.9 percent.

CHARACTERISTICS OF DISABLED BENEFICIARIES ENROLLED FOR HI, 1973-1977

Type of Beneficiary

The largest group of disabled beneficiaries is disabled workers, representing about 80 percent of the enrollment since 1973. The other types of beneficiaries are adults who became disabled during childhood (decreased from 16 percent of the enrollment in 1973 to 14 percent in 1977), widows and widowers (4 percent in both years), and persons eligible only because of ESRD (increased from 0.4 percent in 1973 to 0.6 percent in 1977).

Age, Sex, Race, and Region

The median age of HI disability beneficiaries has remained around 55 years of age since 1973. The percentage of beneficiaries between 55 and 64 years of age has been between 51 and 52 percent of the total since 1973.

Women, as a percentage of the disabled enrolled for HI, increased from 35.4 percent in 1973 to 36.8 percent in 1977. In 1977, women constituted 39 percent of HI beneficiaries between 55 and 64 years of age and about 34 percent of those under 55 years.

The proportion of minorities among disabled HI beneficiaries increased from 14.6 percent in 1973 to 15.8 percent in 1977. The median age of minorities has been about one year less than for whites.

The distribution of disabled HI beneficiaries by region has been stable since 1973. In 1977, the South had the highest proportion of beneficiaries, 37 percent, and the West had the lowest, almost 17 percent. Half of the minorities lived in the South.

CHARACTERISTICS OF DISABLED HI BENEFICIARIES ENROLLED FOR SMI, 1973-1977

Rate of Enrollment

The percentage of disabled HI beneficiaries enrolled for SMI has tended to be lower than that of the aged. In 1977, the percentage of the disabled was 91 percent compared to 96 percent of the aged. This may reflect the presence of disabled veterans in the disability population who may be receiving medical benefits from the Veterans Administration.

Type of Entitlement

Only 90 percent of the disabled workers enrolled for HI enrolled for SMI. This may reflect veteran status among males. By sex, among HI beneficiaries, 88.7 percent of male workers and 92.6 percent of women workers enrolled for SMI. The SMI enrollment among the other categories of disabled HI beneficiaries was around 93 percent.

Age, Race, Sex, and Residence

The distribution of SMI beneficiaries by age, race, sex, and residence showed only small differences from the HI distributions. The percentage of women among SMI beneficiaries was 37.8 percent compared to 36.8 percent among HI beneficiaries.

State Buy-Ins

In 1977, SMI premiums for about 460,000 disabled beneficiaries were paid by States and other governmental jurisdictions. This group constituted 19.6 percent of the SMI enrollment.

BENEFICIARIES WITH END-STAGE RENAL DISEASE (ESRD)

Number

On July 1, 1977 there were 16,514 persons under age 65 receiving Medicare benefits because they met the insured status requirements for coverage only because of ESRD. In addition, there were 15,245 persons who were "dually" entitled because, in addition to meeting insured status requirements because of ESRD, they had been entitled to receive disability cash benefits for at least 24 consecutive months.

Age, Sex, Race

Among beneficiaries receiving Medicare benefits only because of ESRD, the median age was 45.3 years; 51 percent were men, and 49 percent were white.

Among those who were "dually" entitled, the median age was 48.5; 64 percent were men, and 67 percent were white.

The Aged

Enrollment Growth of the Aged, 1966-1977

The enrollment of the aged in the Hospital Insurance (HI) and Supplementary Medical Insurance (SMI) parts of Medicare has increased each year since the beginning of the program. As indicated in Table 1, enrollment in the HI program grew 23 percent, from 19.1 million in 1966 to 23.5 million in 1977 because persons aging into the program exceeded beneficiaries who died. SMI enrollment grew 30 percent from 17.7 million in 1966 to 23 million in 1977. Nearly all persons 65 years and over are entitled to HI. (For estimates of the number of aged not covered by Medicare, see U.S. Bureau of the Census, 1970 Evaluation.) Persons wanting SMI coverage must voluntarily enroll and must pay a premium. During the period from 1966 through 1977, the average annual rate of increase in HI enrollment was 1.9 percent. The average annual rate of increase in SMI enrollment during the period between 1967 and 1977 was 2.5 percent. The 5 percent increase in SMI enrollment between 1967 and 1968 was caused by the first general enrollment period, which took effect on July 1, 1968. Between 1972 and 1973, SMI enrollment increased almost 3 percent, reflecting the removal of the 3-year limit for enrollment during the 1973 general enrollment period and the beginning of automatic enrollment of persons entitled to HI unless specifically declined by the beneficiary.

The number of persons 65 years and over covered only by HI benefits increased in 1977 from a record low of 825,000 in 1976 to 848,000. The increase was caused by fewer persons electing SMI coverage during the general enrollment period (GEP) that ran from January through March 1977, with coverage beginning July 1, 1977.

TYPE OF ENTITLEMENT

Table 2 indicates that, in 1977, about 94 percent of the persons entitled to HI benefits were receiving or were eligible for social scurity benefits, and about 4 percent were receiving or were entitled to railroad retirement benefits. Some persons are entitled to both social security and railroad retirement cash benefits because of earnings under both programs. From 1975 on, these persons are reported, in Table 2, as entitled to railroad retirement benefits. Prior to 1975 these persons are counted in both categories but only once in the total. The remaining enrolled population were not entitled to receive cash benefits under either social security or railroad retirement, and are classified as "other enrolled persons." This group is entitled to HI coverage under a transitional provision of the law. Under this provision, persons who attained age 65 before 1968 needed no work credits under social security to be entitled to HI. After 1967, (i.e., beginning January 1, 1968) three calendar quarters of work credits under social security were required for each year after 1966 for entitlement to HI coverage. By 1975, entitlement to HI required the same number of quarters of coverage as required for entitlement to social security cash benefits. The number of "other enrolled persons" steadily declined from 1.5 million on July 1, 1967 (7 percent of the total) to 668 thousand by July 1, 1977 (3 percent of the total), primarily because deaths exceeded new enrollments in this group, a trend that is expected to continue.

DEMOGRAPHIC CHARACTERISTICS

Table 3 shows the year-to-year changes since 1966 in selected demographic characteristics of aged persons enrolled for HI. The remaining tables in this section show the changes since 1966 in percentage distributions in more refined breakdowns of these demographic characteristics: age (Table 4), sex and race (Table 5), residence (Table 6), and race and residence (Table 7). Hence, references will be made to both Table 3 and the detail tables.

Age, Sex, and Race

Table 4 indicates that the age distribution of persons 65 years and over in 1977 continued to show the trend toward greater longevity among the aged beneficiary population. In 1966, 37.2 percent of the HI population was age 75 and over; in 1977, 40.5 percent reached age 75 and over. Those 85 years and over showed the largest rate of increase since Medicare began, increasing from 6.2 to 8.9 percent.

As may be derived from Table 3, between 1966 and 1977 there was an increase of 27 percent in the number of women enrolled for HI compared to 17 percent increase for men. The increase of women has been greater each year. As a result, as shown in Table 5, the proportion of men among HI beneficiaries has declined steadily since 1966. In 1977, men comprised 40.6 percent of all HI beneficiaries compared to 42.6 percent in 1966. During the same period, the proportion of women increased from 57.4 percent in 1966 to 59.4 percent in 1977.

1977	100.0	40.6	36.0	3.7	1.0	59.4	52.9	4.8	1.7

NOTE: Detail may not add to total because of rounding.

The increased proportion of women among HI beneficiaries is attributable to their greater longevity and the declining proportion of foreign-born in the aged population, who were mostly men. The proportion of women aged 75 and over increased from 39 percent in 1966 to 44 percent in 1977. The corresponding increase for men was from 35 to 36 percent (Table 3).

Between 1966 and 1977, persons of other races showed a greater rate of increase than whites among HI beneficiaries. Table 3 shows that persons of other races increased 37 percent. As a result, as shown in Table 5, the proportion of persons of other races among HI beneficiaries increased from 7.5 percent to 8.5 percent. Persons of unknown race represented about 3 percent of the beneficiaries during this period—mostly railroad retirement beneficiaries.

As was true for the general enrollment, women of other races increased more (41 percent) than men of other races (31 percent) between 1966 and 1977 (Table 3).

GEOGRAPHIC DISTRIBUTION

Table 6 contains percentage distributions by census region and division. All four regions showed annual increases from 1966 to 1977 in the number of persons covered by HI benefits (Table 3). In 1977, the largest proportion of the HI population lived in the South, and this has been true since 1968. During the period 1966 to 1977 the South had the largest numerical growth (1.9 million) and the highest relative increase (35 percent), thereby increasing the proportion of HI beneficiaries living in the South from about 29 percent to almost 32 percent. The West, which has always had the smallest proportion of the enrolled HI population, showed the next highest enrollment gain during the 1966-1977 period (900,000), which increased the proportion of HI beneficiaries living there from 15 to 16 percent. Changes in enrollment by census region depend not only on the number of persons aging into the program and the number of deaths among those aged 65 and over, but also on interstate migration of Medicare beneficiaries. Over 1 percent of all persons 65 and over migrated between regions between 1975 and 1977, chiefly from the Northeast and North Central States to the South (U.S. Bureau of Census, Number 320).

By census division, both the Middle Atlantic and East North Central States had the largest proportions (over 18 percent) of the HI beneficiaries in 1977, but both divisions have shown declining proportions over the years. The Mountain States have never exceeded 4 percent of the aged HI beneficiaries, but have been showing a slight increase trend.

Referring to General Table B for 1977 and comparing the data to those for 1966 (Health Insurance for the Aged, 1966: Section 2) shows that enrollment increased in each of the 50 States between 1966 and 1977. The largest numerical rise was in Florida (583,000), accounting for nearly one-third of the total growth of enrollment in the South. Much of Florida's growth came from the migration of the elderly from the Northeast and North Central States (Research and Statistics Note Number 3, 1970).[1]

Ranking next in numerical growth between 1966 and 1977 were: California, 479,000; Texas, 296,000; Pennsylvania, 181,000; North Carolina, 141,000 and New York, 134,000. These six States represented 44 percent of the increase in HI enrollment between 1966 and 1977. The District of Columbia had a 2-percent decline in enrollment probably representing out-migration. The Bureau of the Census reported that between 1965 and 1970, the District of Columbia had a net out-migration of persons 65 years and over (Census of Population: 1970).

Most of the increase in the HI population between 1966 and 1977 occurred in metropolitan counties. In revising standard metropolitan statistical areas, the Office of Management and Budget reclassified many non-metropolitan counties to metropolitan counties without central cities. These revisions, effective in 1973, account for most of the changes shown in Table 3.

By 1977, two-thirds of the aged persons covered by hospital insurance were living in metropolitan counties. The proportions of these beneficiaries showed large variations by geographic area. In the South only 59 percent lived in metropolitan counties, while in the Northeast 83 percent resided in metropolitan counties. Almost three-fourths of the HI beneficiaries living in a metropolitan county resided in the standard metropolitan statistical area having a 1975 population of 500,000 or more (General Table D).

As shown in Table 7, in 1971, 55 percent of the HI beneficiaries of minority races lived in the South. As may be derived from the figures, in every geographical division outside the South, whites constituted over 90 percent of the aged enrollment. In the three divisions of the South, whites constituted only 80 to 84 percent of the HI enrollment.

PREMIUM HI COVERAGE

Effective July 1, 1973, the 1972 Social Security Amendments permitted aged persons who are ineligible for HI to enroll voluntarily by paying a monthly HI premium. Eligibility of persons aged 65 and over requires only that they be citizens or aliens residing permanently in the United States for the previous 5 years. The HI premium was set at $33 a month for a 12-month period beginning July 1973. It increased to $36 beginning July 1, 1974, to $40 beginning July 1, 1975, to $45 beginning July 1, 1976, and to $54 beginning July 1, 1977. This amount represents the estimated per capita cost for services furnished under the hospital insurance program. In addition, these premium HI beneficiaries must be enrolled for SMI. This requirement is intended to reduce the possible excess usage of the more costly HI services.

Table 8 shows the distribution of persons enrolled for premium HI during 1977 by race and sex. During 1977, there were 22,466 persons enrolled for premium

[1] Unpublished tables for beneficiaries receiving benefits on June 30, 1970, June 30, 1971, and June 30, 1972, show similar trends.

Women	1,169	1,309	1,451	1,593	1,911

HI coverage, an 82 percent increase since 1973. Women made up 79 percent of those enrolled. By race, nearly 84 percent of these beneficiaries were white, only 6 percent were of all other races, and for 10 percent, race was not known.

SMI Enrollment of the Aged

THE RATE OF GROWTH IN SMI ENROLLMENT

Between 1966 and 1977, SMI enrollment increased about 30 percent. The average annual increase in SMI enrollment since 1966 was 2.4 percent, derived from Table 9, compared to 1.9 percent for HI. As a result, for the 1966-1977 period, SMI enrollment grew nearly 1.3 times that of HI.

The higher rate of growth of SMI enrollment was reflected in the increased proportion of the HI population also enrolled in SMI as shown in Table 10. This percentage rose from 92.5 percent in 1966 to 96.4 percent in 1977. The proportion declined in 1967 because there was no general enrollment period. The ratio increased in 1968 and again in 1969, then remained virtually unchanged (at about 95.5 percent) until 1973. The large affirmative response during the 1973 general enrollment period accounted for the increase in 1973 (from 95.4 to 95.9 percent). The 1972 amendments provided for automatic enrollment of persons in SMI as they become entitled to hospital insurance beginning July 1, 1973, (see Provisions of the Law).

AGED PERSONS ENROLLED IN HI AND SMI, 1977

The distribution of characteristics among persons enrolled under the HI and SMI programs in 1977 differed little by age, race, and sex. This is to be expected since the proportion of HI beneficiaries also participating in SMI was over 96 percent (Table 10). However, there were some differences by race, sex, and residence among HI beneficiaries in the degree of enrollment in SMI.

Race, Sex, and Residence

Table 10 shows that the largest difference in the proportion of the aged population also enrolled in SMI was between races. In 1977, 96.8 percent of the white population enrolled for HI were also enrolled for SMI, compared with 92.5 percent of all other races. The higher rate for whites in every age and sex group has prevailed since 1966. When Medicare began, the proportion of the HI white population also enrolled in SMI was 93.2 percent, compared with 86.1 percent of persons of all other races—a difference of 7.1 percentage points. Until 1973, the difference hovered around 6 percent when SMI enrollment among whites increased while enrollment for all other races fell, resulting in a difference of 9.5 percentage points. Since 1973, the growth of SMI enrollment among all other races has exceeded that of whites, so the difference in participation rates by race narrowed to 4.3 percentage points by 1977.

The percentage of HI beneficiaries covered by SMI varied slightly by sex. The overall participation of women was greater than that of men by one percentage point, but among persons of all other races, enrollment of women was 2 percentage points greater than of men.

The proportion of HI beneficiaries also participating in SMI in the different regions of the U.S. has converged since 1968. The figures in 1977 ranged from 97.8 percent in the Northeast and North Central States to 97.1 in the South. In 1968, the range was 96.7 in the Northeast to 95.3 in the South. Table 11 shows the rate of SMI participation by geographic division. Here, too, convergence can be noted. A lower rate of SMI enrollment prevailed among HI beneficiaries residing in outlying areas, such as Puerto Rico (See General Table A), and in foreign countries. Medicare benefits are not ordinarily paid for services provided in foreign countries. In the outlying area the average SMI participation rate was 58 percent. Such factors as lower income and differing arrangements for medical care in those areas probably account for the lower rate of SMI enrollment.

[1] Prior to 1970, only a small number of persons were eligible for SMI but not for HI. The number of SMI beneficiaries expressed as a proportion of the number of HI beneficiaries, therefore, provided an adequate measure of participation in the voluntary part of the program. However, by 1970, with 130,000 persons enrolled in SMI but not eligible for HI, enrollment in both HI and SMI as a proportion of HI enrollment has been computed as a more accurate indicator of SMI coverage. The percentages from 1970-77 are so computed.

[2] As of October 1, 1966.

SMI-ONLY BENEFICIARIES

There were 364,000 persons enrolled for SMI on July 1, 1977, who lacked the required work credits for HI eligibility—an increase of 14,000 persons since July 1, 1976 (Table 12). Some 25,000 of them were retired Federal employees insured under the Federal Health Benefits Act of 1959. Beneficiaries enrolled only for SMI differed considerably from those protected by both parts of Medicare. In 1977, 93 percent of those enrolled for SMI only were under 75 years of age, compared to 60 percent of those covered by both programs. Because women are more unlikely to meet the work credit requirements, they comprised 71 percent of SMI-only beneficiaries compared with 60 percent of those covered by both programs. By race, SMI-only beneficiaries had higher proportions of persons of all other races, 22 percent, and persons of unknown race, 5 percent; of those having both HI and SMI coverage the proportions were 8 and 3 percent, respectively. The trend in the distribution of beneficiaries eligible only for SMI by race and sex is shown in Table 12.

STATE BUY-IN AGREEMENTS

At the start of Medicare, 22 States elected to enroll and pay premiums for aged persons who receive cash payments under public assistance programs. Public Law 90-248 extended eligibility effecitve April 1, 1968, to those who qualify for medical assistance programs. By January 1, 1970, the closing date for requesting this arrangement, 46 States, the District of Columbia, Guam, and the Virgin Islands had signed buy-in agreements. No additional States or areas have obtained buy-in coverage since then. However, 27 States and two areas have extended such coverage to aged medically indigent persons. The medically indigent have incomes and assets which are greater than the maximum allowed for qualifying for public assistance but which are inadequate for paying their medical expenses. There were 2.5 million aged buy-ins enrolled as of July 1, 1977, or 11 percent of all SMI beneficiaries. Data for July 1, 1977, indicate that the States having the highest proportions of aged SMI beneficiaries enrolled under the buy-in arrangement were Alabama, Arkansas, Georgia, Mississippi, and South Carolina (Table 13). With the exception of Georgia, these States had the lowest per capita personal income in 1977 (Survey of Current Business, August 1978).

Since 1970, aged State buy-in beneficiaries have represented about 11 percent of the total Medicare aged population as shown in Table 14. The number of beneficiaries under State buy-ins for 1977 represents a slight decline from 1976, the first time there was a year-to-year decrease since the program began.

New Enrollments and Terminations of Aged Persons in 1977

Hospital Insurance

Over 1.7 million aged persons were newly enrolled under HI during 1977, shown in Table 15. New beneficiaries account for about 7 percent of the total, a figure that has remained constant since Medicare began. Nearly all additions to the rolls were persons who had just attained age 65. Also, the provisions of the law for HI coverage permit additions to the rolls at older ages. If a person files his application after he attains age 65, his HI protection can be retroactive for up to 12 months prior to the date he filed his application. HI enrollment of persons after 65 years of age resulted primarily from initial enrollment under premium HI eligibility effective July 1, 1973.

Since coverage ends in the month after death, terminations in 1977 include deaths from December 1976 through November 1977. During 1977, coverage was terminated for 1,240,000 persons who died.[2]

The death rate per 1,000 beneficiaries in 1977 differed slightly by race. The rate for whites was below that of minority races at all age ranges except those 85 years and over as shown in Table 16.

Supplementary Medical Insurance

Additions to the SMI program in 1977 totaled 1.8 million persons, exceeding the number of those newly enrolled for HI by 60,000 persons (Table 15). Additions to the SMI rolls were higher than for HI as a result of three factors: the general enrollment period, the State buy-in program, and the enrollment of persons who are ineligible for HI coverage. New beneficiaries have accounted for 8 to 9 percent of the total enrollment for each year since the beginning of the program.

Persons who fail to enroll during their initial enrollment period are given additional opportunities to do so during the annual general enrollment periods. In the general enrollment period (GEP) which ran from January 1, 1977, to April 1, 1977, nearly 190,000 persons were identified as eligible to enroll. Almost 160,000 chose to do so, with enrollment taking effect on July 1, 1977.[3]

On July 1, 1977, the monthly premium for SMI was $7.70. In addition, for persons who do not sign up in their initial enrollment period, the monthly premium is increased by 10 percent for each full 12 months in which they could have been covered had they enrolled. The increases also apply to persons re-enrolling 12 or more months after their first coverage was terminated.

Nearly 1,268,000 aged persons were terminated from SMI in 1977, 96 percent as a result of death.[4] Only 29,000 of the 23 million aged persons enrolled for SMI withdrew from the program either by notifying the Social Security Administration or by not paying the premium. All but 4 percent of the terminations of white persons were a result of death. Ninety percent of the terminations of all other races resulted from death and the remaining 10 percent withdrew.

The Disabled

Enrollment Growth of the Disabled 1973-1977

From the extension of Medicare coverage (in 1973) to the disabled to 1977, enrollment in both HI and SMI grew 51 percent—an average annual increase of 10.9 percent (Table 17). From 1973 to 1977, HI enrollment increased from 1.7 to 2.6 million and SMI enrollment increased from 1.6 to 2.4 million. The annual percentage increase peaked in 1975 and has since declined due to several factors, among which are: (1) a larger number of newly disabled social security beneficiaries do not remain unable to perform substantial gainful work for the 2-year period required for Medicare coverage and, (2) disabled beneficiaries upon attaining age 65 (the number of which is increasing), are automatically converted to retirement beneficiaries (with one exception noted later).

Among the disabled, the growth of SMI enrollment relative to HI is smaller than that for the aged perhaps because of the availability of other coverage (See Disabled Persons Enrolled in HI and SMI.) By law, disabled persons must be eligible for HI in order to participate in the voluntary SMI program. Unlike the aged, there are no SMI-only beneficiaries in the disabled population, except in rare instances where provisions of equitable relief are applied because of errors in eligibility determinations.

HI Enrollment of the Disabled, 1977

TYPE OF BENEFICIARY

The largest group of disability beneficiaries enrolled for HI in 1977 was 2,127,000 disabled workers who accounted for 81 percent of all beneficiaries, shown in Table 18. The remainder was 370,000 adults disabled as children, 105,000 disabled widows and widowers, and 16,500 beneficiaries eligible solely because of end-stage renal disease (ESRD).

The trend between 1973 and 1977 shows small increases in the percent of workers and ESRD only beneficiaries and a corresponding decline in the percentage of adults disabled as children. The percentage of widows and widowers remained relatively stable.

DEMOGRAPHIC CHARACTERISTICS

Age, Sex, and Race

Table 19 shows that the overall age distribution of disabled HI beneficiaries changed only slightly during the first 5 years of the program. Since 1973, disability beneficiaries between 55 and 64 have constituted over half of the total enrollment and have increased from 50.9 to 52.2 percent. During this same period, beneficiaries under 35 years of age increased slightly from 11.1 percent of the total to 12.3 percent. The age groups 35-44 and 45-55 decreased slightly as proportions of the total.

When the age distribution is examined by type of beneficiary, it is apparent that there are significant age differences among the beneficiary groups. Table 20 shows that the overall age distribution is strongly influenced by the dominance of disabled workers among the HI beneficairies. Examination of Table 20 shows that adults disabled as children and persons eligible because of ESRD are significantly younger than the other groups. Whether the life expectancies of the younger groups would eventually alter the age distribution of these entitlement groups is not clear at this time.

Between 1973 and 1977, the increase in disabled HI beneficiaries was greater for women (58 percent) than for men (48 percent), resulting in a higher proportion of women to the total (from 35.4 percent in 1973 to 36.8 percent in 1977).

This change is reflected in the relative growth of women in each 10-year age group from 35 to 64. Only in the group under 35 did the proportion of women decrease (Table 21).

Again, when the sex distribution is examined by type of beneficiary, significant differences from the overall distribution are found. Table 22 shows that men comprised 68 percent of disabled workers, reflecting their greater participation in the labor force, while little more than half of the persons disabled in childhood and those entitled because of ESRD were men. Among disabled widows and widowers, fewer than 1 percent were men.

Enrollment of disabled persons of all other races has increased about 2 percent each year since 1973. Table 23 shows that the proportion of beneficiaries other than white was 14.6 percent in 1973 and 15.8 percent in 1977. Thus, in 1977, the proportion of disabled Medicare beneficiaries of other races aged 20-64 was higher (12 percent) than the proportion of other races in the general population (U.S. Bureau of Census, 1975). This was particularly true among persons eligible only because of ESRD, where minorities constituted 27 percent of the total (Table 22).

White beneficiaries have had a higher median age since 1973. In 1977, the median age of white men was 2.5 years greater than for men of other races. The difference in median age of disability beneficiaries by race shows a slight increase since 1973 attributable mainly to the increased median age of the white population (Table 24). The median age of all other races declined for men, while for women it remained unchanged.

GEOGRAPHIC DISTRIBUTION

The geographic distribution of disabled beneficiaries has remained stable since 1973. As shown in Table 25, in 1977 the distribution of disability beneficiaries covered by HI ranged from 17 percent in the West to 37 percent in the South. Among disabled beneficiaries of minority races, 50 percent lived in the South, while the lowest proportion, 13 percent, lived in the West. Whites represented between 83 and 94 percent of all disability beneficiaries enrolled for HI in all geographic regions except in the South. In the geographic divisions of the South, whites accounted for between 76 and 79 percent of disabled HI beneficiaries. These distributions are similar to those for the aged.

NOTE: Percentages may not add to totals because of rounding.

[1] Includes persons of unknown race.

The distribution of disability beneficiaries by metropolitan-nonmetropolitan county of residence was similar to that of the aged. General Table H shows that two-thirds of the disabled enrolled for HI in 1977 lived in metropolitan counties. By geographic division, the Middle Atlantic and Pacific States had the highest proportion living in metropolitan counties (84 percent) while only 45 percent lived in such counties in the East South Central States. In 1977, of those disabled living in metropolitan counties, nearly three-fourths were located in standard metropolitan statistical areas which in 1975 had populations of 500,000 or more.

SMI Enrollment of the Disabled

DISABLED PERSONS ENROLLED IN HI AND SMI

On July 1, 1977, the number of disabled beneficiaries enrolled for SMI was 2,372,642. The proportion of disabled HI beneficiaries enrolled in SMI was 91 percent (Table 26), about the same as it was a year earlier. The comparable rate for aged beneficiaries as of July 1, 1977 was somewhat higher, 96 percent. Even at the beginning of the Medicare program, the proportion of SMI enrollment among the aged was higher—93 percent (Medicare: Health Insurance for the Aged, 1966).

The relatively high proportion of veterans among disability beneficiaries may explain the lower SMI participation rate. Veterans, especially those with severe disabilities, may have declined SMI enrollment because it requires a monthly premium, and, too, they may be entitled to free medical care from the Veterans Administration.

Evidence of the degree of use by disabled veterans of medical services furnished by the Veterans Administration (VA) or the armed services, is found in the Current Medicare Survey of the Disabled. This survey reported on the use of medical services in 1974 by disability insurance beneficiaries. Of the estimated 42.3 million covered medical services used by those disabled, 6.9 million, or over 16 percent of them, were provided by the Veterans Administration and the armed forces (Ronald W. Deacon, Health Care Financing Review, Fall 1979). This suggests that the coverage provided by Medicare's supplementary medical insurance does not have the same utility for veterans eligible for VA benefits as it might have for non-veterans.

DEMOGRAPHIC CHARACTERISTICS

Type of Entitlement

As shown in Table 27, in 1977, disabled workers enrolled in HI have the lowest rate of participation in SMI, 90 percent; workers aged 45-49 showed the lowest proportion (87.6 percent). This may be related to previous war veteran status which may have entitled them to receive medical services from the Veterans Administration or the armed services. This may also explain why SMI enrollment among women disabled workers (93 percent) is higher than for men (89 percent). There was a relatively low rate (91.5 percent) of SMI participation among adults disabled as children (who were under age 35). This may reflect coverage under parents' private health insurance.

Age, Race, and Sex

Despite the differential rates of enrollment in SMI shown in Table 27, the age, sex, race distributions of the SMI beneficiaries (Table 28) was only slightly different from the comparable distributions among the HI beneficiaries. The largest difference was in the percentage of women beneficiaries, from 36.8 percent of the HI beneficiaries (Table 22) and 37.8 percent of the SMI beneficiaries (derived from Table 28). The proportion of beneficiaries over 55 years of age was 52.2 percent among HI beneficiaries compared to 52.9 percent of the SMI beneficiaries.

Residence

Table 29 shows that the rate of HI eligibles in SMI was lowest in New England and the Mountain States (90.6 percent) and highest in the East South Central States (93.9 percent). In every geographic division the SMI enrollment rate of women exceeded that of men. However, as shown in Table 30, the percentage distribution of SMI beneficiaries was only slightly different from HI beneficiaries (shown in Table 25).

STATE BUY-IN AGREEMENTS

On July 1, 1977, there were about 460,000 disabled beneficiaries enrolled for Supplementary Medical Insurance under State buy-in agreements. This constituted 19.4 percent of the total SMI enrollment (Table 31). California had the highest percent of disabled beneficiaries enrolled under the State buy-in program (45 percent) followed by the District of Columbia (39 percent).

In 1973, disabled State buy-in beneficiaries represented 14 percent of the disabled SMI population in the U.S. (Table 32). The percentage increased each year until 1977, when a slight decline occurred, going from 19.8 percent in 1976 to 19.6 percent.

Beneficiaries With End-Stage Renal Disease

There were 16,514 persons under age 65 entitled to Medicare on July 1, 1977, solely because they had ESRD and met the insured status requirements (Table 33). For such persons, eligibility for Medicare coverage begins with the third month after the month in which a course of dialysis begins. Eligibility may begin before completing this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting dialysis or receiving dialysis in preparation for transplantation. Excluded from the count of those solely eligible because of ESRD were 15,245 persons with ESRD who were "dually" entitled to Medicare on July 1, 1977, because they met both the insured status requirements and were entitled to at least 24 consecutive months of disability insurance benefits. Persons eligible solely because of ESRD who are receiving dialysis are not entitled to disability insurance benefits if they are able to work. However, because of the high cost of treatment, these persons are also covered by Medicare if they meet the insured status requirements.

TYPE OF ENTITLEMENT BY AGE, SEX, AND RACE

ESRD Only

As can be derived from Table 33, in 1977 the median age of persons enrolled in HI who were entitled solely because of ESRD was 45.3 years. The median age of women with ESRD was 2.1 years greater than that of men. By race, the median age of whites was 45.5 years or 0.3 years more than of persons of all other races. For both sexes, the number of ESRD beneficiaries was higher in each successive age group and was highest at ages 45-54. The number in the 55-64 age group was slightly lower than in the 45-54 age group.

By race, 69 percent of ESRD beneficiaries were classified as white, 27 percent were members of all other races, and for 4 percent race was unknown. There were slightly more men than women for both racial groups.

Dually Entitled

The characteristics of beneficiaries who were dually entitled to Medicare differed from those eligible solely because of ESRD (Table 34). The dually entitled were older; 59 percent were aged 45 and over (median age was 48.5) compared with 51 percent for those entitled solely because of ESRD. By sex, 64 percent of the dually entitled were men while the proportion of men among those eligible solely because of ESRD was 51 percent. About 67 percent were white.

New Enrollments and Terminations of Disabled Persons in 1977

Hospital Insurance

Almost 500,000 disabled persons were newly enrolled for HI from January 1 through December 1, 1977, as shown in Table 35. Nearly 30 percent were 60-64 years of age. New beneficiaries accounted for 19 percent of the total enrollment in 1977, continuing a slight downward trend since 1975 when 22 percent were newly enrolled.

During 1977, nearly 300,000 disability beneficiaries were terminated for HI coverage, as shown in Table 36. More than half of these were persons who were transferred to the retirement program upon reaching age 65. Of the remainder, 92,000 terminations were because of death, and 34,000 lost Medicare coverage because of recovery. Recovery means the person either no longer met the medical standards for disability or had demonstrated, despite an impairment, an ability to engage in substantial gainful activity.

Supplementary Medical Insurance

New beneficiaries accounted for 18 percent of the total enrollment in 1977, or over 480,000 persons. The percent of newly enrolled to total SMI enrollment has declined from a high of 25 percent in 1975.

About 288,000 disabled beneficiaries were terminated for SMI coverage in 1977. Over half attained age 65 and were transferred to the retirement program (Table 36). Of the remainder, 84,000 terminations were because of death, and about 30,000 recovered from their disability.

Table 37 shows aged and disabled enrollment data by Standard Federal Administrative regions for purposes of analysis and to maintain historical continuity.

Appendix A

Source and Limitations of Data

The HIM File

The data on age, sex, race, and place of residence of the enrolled population are from the health insurance master (HIM) record file. Changes or corrections in the characteristics of the beneficiaries, new enrollments, and terminations are entered into the file daily. Data for 1977 are from the HIM record file summarized on March 31, 1978.

Place of Residence

The beneficiary's place of residence is defined as his mailing address. This mailing address is not necessarily his actual place of residence. For example, some beneficiaries have their checks mailed to a bank, a post office, or to a representative payee in a State or county which may differ from the residence of the beneficiary.

Temporary or permanent changes in address are shown as beneficiaries report them to the Social Security Administration. Only the current mailing address is kept in the HIM record file and that address is classified as the place of residence. The address that is in the file on the date of tabulation is used for all tables.

Residence Unknown

There were 24,000 aged and 7,000 disabled persons with unknown residence recorded in the HIM record file in 1977 (Tables F and K). Most of these entries for the aged where the result of processing errors with respect to codes for State or foreign countries. Most of the unknown addresses for the disabled were the result of temporary enrollment records being established for those entitled to benefits because they had end-stage renal disease. The number of beneficiaries whose residence was unknown may be calculated from Tables C and H for each region and division.

Race Unknown

On July 1, 1977, the number of aged HI beneficiaries without a race designation was over 640,000—17,000 more than the previous year. There were 41,000 disabled persons (primarily RRB beneficiaries) whose race was not known on July 1, 1977. The relatively high proportion of RRB beneficiaries without a race designation is due to data exchange procedures which do not contain a race designation. Changes in HI enrollment by type of entitlement among aged persons classified as race unknown between 1976 and 1977 are shown in Table 38.

TABLE 38

Number of Aged Persons with Unknown Race by Type of Entitlement, July 1, 1976 and 1977

(in thousands)

Type of Entitlement	HI Enrollment 1976	HI Enrollment 1977	Change 1976	Change 1977
Total Aged Race Unknown [1]	623	640	17	
Entitled to RRB	348	383	35	
Entitled to Social Security	160	151	—9	
Other Enrolled Persons	115	107	—8	

[1] Persons entitled to social security and railroad retirement benefits are counted as railroad retirement beneficiaries.

Persons Enrolled as of the Mid-Period of 1977

Enrollment as of July 1, has been chosen as the population base for utilization rates to be published in other sections of the Medicare data series. The choice was based on the similarity of the July 1 enrollment to a 12-month average enrollment. A comparison of aged HI enrollment by age, race, and sex on July 1, 1977, with an average of 12 monthly enrollment figures in 1977 (computed from Table E) showed remarkable similarity. Less satisfactory was SMI enrollment in July, which was consistently higher than the 12-month average enrollment. This difference resulted from additions to the rolls on July 1 of persons who requested coverage during the general enrollment period. However, deriving a monthly average enrollment from a fixed date of tabulation involves a possible understatement of the number enrolled since enrollment data are less complete in the months closest to the date of tabulation. The difference between the July 1 figure and the true monthly average may be less than that observed in the present data.

Appendix B

Provisions of the Law and Regulations

The Medicare program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. In 1972 major changes were made in the program's provisions by Public Law 92-603 enacted October 30, 1972. The name of the Medicare program was officially changed to Health Insurance for the Aged and Disabled. (The Social Security Act, 1975).

Effective July 1, 1973, Medicare coverage was extended to disabled beneficiaries under the social security or railroad retirement programs, and to persons under age 65 who require dialysis or a kidney transplant for end-stage renal disease.

The program makes available two separate but complementary insurance programs: hospital insurance, covering nearly all persons age 65 and over, disabled beneficiaries under age 65 entitled to benefits for at least 24 consecutive months, and covered workers and their dependents with end-stage renal disease who require renal dialysis or a kidney transplant; and supplementary medical insurance, covering those persons who voluntarily pay the premiums. Beginning July 1973, most persons age 65 or over otherwise ineligible for hospital insurance may enroll voluntarily and pay the premiums for hospital coverage if they are enrolled for supplementary medical insurance.

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the cost of inpatient hospital care and related health care services provided by skilled nursing facilities (formerly termed extended care facilities), and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program (Medicare: Health Insurance for the Aged, 1972-74). An exception exists under special provisions for hospitals certified to provide only emergency services.

Benefits

The law provides limits on services which may be covered under the HI program. These limits are based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing facility for 60 consecutive days.

The law also established cost-sharing by the individual through deductible and coinsurance payments. The Secretary of the Department of Health and Human Services is required each year to determine the deductible amount, by a formula, specified by law, which is based on the average per diem rate for inpatient services furnished beneficiaries during the preceding calendar year. The deductible amount tends to approximate the current cost of 1 day in a hospital. The coinsurance amount for hospital inpatient care is set at one-fourth of the deductible, for lifetime reserve days at one-half of the deductible, and for skilled nursing facility services at one-eighth of the deductible.

INPATIENT HOSPITAL BENEFITS

Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private duty nursing), drugs and biologicals, and other services ordinarily furnished by a hospital to its inpatients.

The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and psychiatrists) except for services provided by interns or residents under approved teaching programs.

The program pays for the "reasonable costs," of covered services in a participating hospital for up to 90 days in a benefit period. Full payment is made for the first 60 days of hospitalization, less a deductible applicable to each benefit period. The deductible, which is adjusted to each year, was $124 in 1977 (the year of data in this report) and rose to $144 in 1978. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount equal to one-fourth of the deductible.

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days were subject to a copayment of $62 per day, equal to one-half of the deductible, in 1977. In 1978, this increased to $72.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program as are charges for blood administration, storage, etc.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services may elect to claim payments from the Medicare program for emergency services rendered beneficiaries in a given year. If the hospital elects this option, reimbursements is made as described above. If the hospital elects not to bill the program, the beneficiary claims direct payment and submits the itemized bill. In this case, reimbursement is based on reasonable charges for covered services, and amounts to 60 percent of reasonable charges for room and board, plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. When a person in a participating psychiatric hospital becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period prior to his eligibility is deducted from his days of entitlement to inpatient psychiatric care in that benefit period, but not from the lifetime limitation.

Hospital insurance benefits have been extended to cover payments for inpatient services furnished by a foreign hospital, if it is closer to or more accessible to the beneficiary's residence than a U.S. hospital. For benefits to be payable, the beneficiary must be a U.S. resident and the foreign hospital must be accredited by, or have standards equivalent to, the Joint Commission on Accreditation of Hospitals (JCAH).

SKILLED NURSING FACILITY BENEFITS

Covered extended care services furnished by a skilled nursing facility include nursing care; room and board; physical, occupational or speech therapy; drugs and biologicals; medical service of an intern or resident-in-training of a hospital having a transfer agreement with the skilled nursing facility; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating skilled nursing facilities for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more; generally the admission to the facility must occur within 14 days of hospital discharge. However, a period of up to 28 days after discharge from a hospital is permitted when the patient's medical condition or shortage of beds delay the admission date. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount per day equal to one-eighth of the inpatient hospital deductible ($15.50 in 1977, and $18 in 1978).

For extended care services to be covered, a physician must certify that the patient needs daily skilled nursing care or skilled rehabilitation services and must order the services. The 1972 amendments include a provision of advance approval of extended care services, whereby the Secretary of HEW established, by medical condition, when a patient will require skilled nursing care services after hospitalization. Accordingly, a patient's physician may certify the need for a skilled nursing facility and submit a plan, in advance of admission, as to the type of services to be provided. The plan will be presumed to be the type of care covered in a skilled nursing facility.

POST-HOSPITAL HOME HEALTH BENEFITS

Covered home health services may include part-time or intermittent nursing care; physical, occupational or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. There is no deductible or coinsurance. The visits must occur within a year following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or from a covered stay in a skilled nursing facility. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or skilled nursing facility. A home health plan must be established by the patient's physician within 14 days after the hospital or skilled nursing facility discharge. The 1972 amendments include a provision for advance approval of home health coverage similar to that provided for skilled nursing care services.

Supplementary Medical Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services; outpatient hospital services; and home health services. Individuals participate voluntarily in the program. Premiums are paid by or on behalf of all beneficiaries, and by the Federal Government from general revenues.

Benefits

Physicians' services covered under the program include visits to the home, office, hospital, and other institutions. The program also pays for other services and supplies, such as drugs, and biologicals that cannot be self-administered, if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests, X-rays, radium, and radioactive isotope therapy; splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment; ambulance service, and prosthetic devices that replace all or part of an internal organ. Also provided are home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made for up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient speech and physical therapy services. In addition, effective July 1, 1973, the 1972 amendments provide for services of a physical therapist in independent practice furnished in his office or the patient's home, under a physician's plan. Reimbursement would be limited to not more than $100 of incurred expenses in a calendar year.

Some services of a licensed chiropractor are covered. Covered services are limited to treatment by means of manual manipulation of the spine to correct a subluxation demonstration by X-ray.

In each calendar year through 1972, a $50 deductible had to be satisfied before payment could be made under the SMI program. In 1973, the deductible was raised to $60, where it currently remains. Bills count toward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count toward the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time, a "carryover" provision is provided. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year are also credited toward the deductible for the following year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physicians' services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are reimbursed.

When an independent laboratory bills patients directly and accepts assignment, the Secretary is authorized to negotiate a payment rate with the laboratory for the diagnostic tests it provides Medicare beneficiaries. Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible and coinsurance requirements do not apply. Hospital services, incident to outpatient care, and home health services, are subject to the deductible and are reimbursed on the basis of 80 percent of reasonable costs. However, coinsurance payments for home health services were eliminated after December 1972.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness; recognition of incurred expenses is limited to the lesser of $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to $250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

Hospital Insurance

Almost all prsons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own covered employment or as a dependent or survivor of an insured worker. The provision applies, generally, to a person aged 65 or over who (1) attained age 65 before 1968, or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attained age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year—six quarters are needed by those who reached aged 65 in 1969, nine by those who reached 65 in 1970 and so on. The transitional provision does not apply to persons attaining age 65 after 1974.

Hospital insurance protection under certain circumstances can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Effective July 1, 1973, disabled persons entitled for not less than 24 consecutive months to cash benefits under the social security or railroad retirement programs are eligible for benefits under the hospital insurance program. Those covered include disabled workers under 65 years, disabled widows and disabled dependent widowers between the ages of 50 and 65, women aged 50 or older entitled to mother's benefits who for 24 months met requirements for disability benefits but did not file a claim, and disabled beneficiaries age 18 or over who became disabled before age 22. A person must be disabled for 5 months before disability benefits can begin. Medicare coverage begins with the 30th month after the first full calendar month of disability.

Hospital insurance protection was also extended to persons under age 65 who are currently or fully insured or entitled to monthly social security benefits, and to their spouses or dependent children who have end-stage renal disease and require renal dialysis or a kidney transplant. Eligibility for coverage begins with the 3rd month after a course in renal dialysis begins or before this qualifying dialysis period for ESRD beneficiaries receiving kidney transplants without starting or receiving dialysis in preparation for transplantation. Eligibility ends with the 12th month after the person had a kidney transplant or dialysis was terminated.

The law now permits persons attaining age 65 who are ineligible for hospital insurance either as cash beneficiaries or under the transitional provisions to purchase hospital coverage.

Coverage under this provision was effective July 1, 1973 and the monthly premium set at $33 rose to $36 starting July 1, 1974, to $40 beginning July 1, 1975, to $45 on July 1, 1976, to $54 on July 1, 1977, and to $63 on July 1, 1978. The premium represents the estimated per capita cost for services furnished under the hospital insurance program. Individuals may enroll in the hospital insurance program only if they enroll in the supplementary medical insurance program. Enrollment periods for hospital protection were the same as the initial and general enrollment periods under supplementary medical insurance.

Persons who retired from Federal service after July 1, 1960, and had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959 are ineligible for hospital insurance benefits under the transitional provisions.

Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crime against the security of the United States.

Supplementary Medical Insurance

Persons entitled to benefits under the hospital insurance program, retired Federal employees, aliens residing in the United States, and persons not eligible for hospital insurance under the transitional provisions may participate voluntarily in the SMI program. To enroll prior to July 1, 1973 the person had to file a written request with the Social Security Administration during specified periods. To prevent loss of entitlement or delay, the 1972 amendments provide for automatic enrollment in SMI for persons as they become entitled to hospital insurance. An individual may decline SMI enrollment. If he withdraws before his coverage starts, there is no premium liability, nor is he charged with an enrollment.

Individuals may enroll in the SMI program only during the initial and general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual is first eligible and ends 3 months atfer the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he is first eligible, his coverage is effective with the month in which he is first eligible; if he enrolls during the month he is first eligible, his coverage begins the following month; if he enrolls in any of the 3 months after he is first eligible, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, SMI general enrollment periods are from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period or who previously terminated their enrollment and wish to re-enroll. A person who enrolls during a general enrollment period is covered under SMI beginning with July 1 of the year in which he enrolls. Prior to the 1972 amendments, an eligible individual had to enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. The 3-year limitation is no longer applicable. Re-enrollment is allowed only once.

A State may enroll eligible aged and disabled individuals who receive cash payments under State supplementary income or State supplementation programs, or are otherwise eligible for medical assistance under Title XIX if: (a) prior to January 1, 1970, the State requested that a State-Federal enrollment agreement be established, and (b) the State pays the necessary premiums.

For a person 65 years and over, enrollment terminates with the beginning of the month following the month of death. For the disabled person, coverage terminates with the end of entitlement to benefits based on disability. For a person with end-stage renal disease, coverage ends 12 months after he has a transplant or dialysis treatment ends. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time; their coverage is terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of their desire to withdraw from the program. The beneficiary is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated. The 1972 amendments extend the 90-day grace period for an additional 90 days when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period.

Financing The Program

Hospital Insurance

The hospital insurance program is financed primarily through a tax on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the tax is applied began at $6,600 for calendar year 1966; it increased to $7,800 effective with 1968 and $9,000 effective with 1972. The 1972 amendments established an automatic adjustment procedure for determining maximum annual earnings based on rising wages. The maximum earnings amount was $15,300 for 1976 and $16,500 for 1977.

The same tax rate applies to employees, employers, and self-employed persons. The rate was 0.60 percent for each year 1968-1972. The scheduled rate for 1973 was 1.00 percent, 0.9 percent for 1974-1977, and rates increase for future years up to 1.5 percent for 1986 and thereafter. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in the Federal hospital insurance trust fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The hospital insurance trust fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. Amounts paid for hospital insurance coverage by persons voluntarily paying the premiums are deposited in the hospital insurance trust fund.

Supplementary Medical Insurance

Premiums are paid into the Federal supplementary medical insurance trust funds by those persons enrolled for supplementary medical insurance (or on their behalf) and a matching amount is paid by the Federal Government from general revenues: Benefits and administrative costs are paid from monies in the SMI trust fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Health Care Financing Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. A person is given an additional 90 days to pay the premium when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period. Premiums may be paid for as long as a year in advance. For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

AMOUNT OF PREMIUM

The Secretary of DHHS is directed by law to determine the SMI premium rate on an annual basis. The dollar amount, prior to the amendments of 1972, was required to be sufficient to produce revenue equal to one-half the expected benefit and administrative costs payable under SMI during the period in which the rate applied. Between 1966 and 1972, the premium increased from $3.00 to $5.80 a month. The 1972 amendments made changes in the method of premium determination. The rate is to be determined in December each year and is applicable for 12 months beginning the following July. It will be increased only in the event of a general cash benefit increase. The percentage increase in the premium in any given year may not exceed the percentage increase in cash benefits. Further, the rate must be determined so that the revenue produced does not exceed, but may be less than, one-half the expected SMI costs. When the premium revenue is less than half the expected SMI costs, the difference is paid by the Federal Government from general revenues. The monthly rate was $7.20 effective July 1976 and increased to $7.70 in July 1977.

Administration of the Program

Hospital Insurance

Under the HI program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as an intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Health Care Financing Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered under the program, makes payment, and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services; (2) serving as a center for communicating with providers; and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Under the law, the reasonable costs of services are determined pursuant to regulations established by the Secretary of DHHS. These regulations prescribe the method(s) used to determine costs and the items to be included; they take into account both direct and indirect patient care costs (Code of Federal Regulations, Title 20).

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program on a physician's behalf for services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payment can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary Medical Insurance

Under the SMI program, the Secretary of DHHS may enter into contracts with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in applying safeguards against unnecessary use of services.

The allowable charge, on which the Medicare SMI payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the service, (2) the prevailing charge in the locality for similar services, or (3) the charge applicable for comparable services under comparable circumstances to the policyholders or subscribers of the carrier. The 1972 amendments provided that increases in the prevailing charge levels would be limited by an economic index furnished by the Health Care

Financing Administration to all carriers. The economic index relates physicians' fee increases to increases in physicians' practice expenses and increases in the general earnings level.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the preceding calendar year. The revised allowable charge levels go into effect on July 1 of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1975, allowable charge levels were calculated from actual charge levels for calendar year 1974. However, allowable charges could not exceed the upper limit of the prevailing charges set by law at the 75th percentile of customary charges (weighted by frequency) made for similar services.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the payment for benefits to a physician or other supplier of services who is willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the $60 deductible (effective 1973), if applicable to the current bill.

Services furnished by group-practice prepayment plans (GPPPs) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Health Care Financing Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

For bills incurred in the SMI portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

Health Maintenance Organizations

The 1972 amendments enabled health maintenance organizations (HMOs) to receive reimbursement from Medicare on a capitation basis for both HI and SMI services. An HMO is an organization which provides to enrolled persons, either directly or by arrangement with others, comprehensive health services on the basis of a periodic rate without regard to the frequency or extent of services furnished to a particular beneficiary. For Medicare purposes, an HMO must provide all of the Medicare covered services generally available in its service area.

Prior to the 1972 amendments, HMO-type plans could be reimbursed under Medicare on a capitation basis only for the costs of providing physicians' and related SMI services. Plans that also provided inpatient hospital, skilled nursing facility, and home health care as covered benefits to their members billed Medicare through intermediaries and carriers on a fee-for-service basis the same as any other provider. Plans that do not choose or cannot qualify to participate under the HMO option may continue to receive Medicare reimbursement on this basis under the group practice prepayment plan (GPPP) regulations.

Plans that do not choose to participate under either HMO or GPPP regulations may continue to bill Medicare, through carriers and intermediaries, for all Medicare covered services provided to their members who are Medicare beneficiaries. The majority of the existing plans are in this category.

Appendix C

The Statistical System of the Medicare Program

The primary objective of the Medicare statistical system is to provide data to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by disabled persons and persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, skilled nursing facilities, home health agencies, independent laboratories, and suppliers of portable X-ray and outpatient physical therapy services to participate in the program, provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the services used under Medicare and the demographic characteristics of individual beneficiaries.

The Basic Records

The statistical system is based on four related computer records: the health insurance master file, provider record, hospital insurance (Part A) utilization record, and the medical insurance (Part B) payment record.

The Health Insurance Master File

The health insurance master file identifies each aged and disabled person eligible for health insurance benefits and indicates whether he is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both. The entitlement record provides the population data for each part of the program which serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

Provider Record

Every hospital, home health agency, skilled nursing facility, independent clinical laboratory, and supplier of portable X-ray or outpatient physical therapy services must apply for participation in the Medicare

program. Data on the application forms are stored in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care, to the kinds and amounts of service used by persons insured under Medicare.

Utilization Record for Hospital Insurance

The administration of the hospital insurance (HI) program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him.

When a patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Health Care Financing Administration's central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days of inpatient care to which he is entitled during his current benefit period.

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to the Health Care Financing Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures is coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Admission and billing forms are handled in a comparable manner by home health agencies and skilled nursing facilities. The outpatient billing form is also transmitted to the Health Care Financing Administration for entry in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospitals and skilled nursing facilities that is needed to administer the "benefit period" provision is recorded centrally. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or skilled nursing facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons. It contains the information needed for tabulation from the three files related to HI utilization.

Payment Record for Medical Insurance

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills with allowed charges in excess of $60 during a calendar year.

For the enrolled population, carriers need to know from a central source the amount of the deductible that has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Health Care Financing Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

The administration and operation of the program requires accurate and complete information of the amounts paid by the carriers for physicians' services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card or other machine-readable form of each bill paid. A bill is defined as a request for payment from or on behalf of a beneficiary as a result of services provided by a single physician or supplier.

Appendix D

Definitions

Health Insurance for the Aged and Disabled—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over and disability beneficiaries under age 65.

End-Stage Renal Disease—Persons eligible solely on the basis of end-stage renal disease (ESRD) includes those under 65 years old eligible under the Social Security Amendments of 1972, Section 299-I of Public Law 92-603. Although the law refers to chronic renal disease, the term end-stage is generally used as it is more appropriate to describe that stage of renal impairment which cannot be favorably influenced by conservative management alone, and requires dialysis and/or kidney transplantation to maintain life or health.

Type of Coverage—The program provides two types of insurance: A basic hospital insurance plan and a voluntary supplementary medical insurance plan.

Persons Ever Enrolled—All persons eligible for benefits at any time during a calendar year.

Age—In completed years at last birthday on the reference month of the table for persons alive on December 31st. For persons dying during the year, in completed years on the date of death.

Race—White, all other races, or unknown, as entered into the Health Insurance Master record file from basic records completed by the primary beneficiary. Race unknown, whether or not specially indicated in a table, is included in the "all persons" or equivalent totals. Race is shown for an SMSA if at least 10 percent of the beneficiaries in the area covered under the hospital insurance program were beneficiaries of all other races.

Sex—As recorded in the HIM record file.

Geographic Classifications—Based on the address to which the beneficiaries' cash benefit check is being mailed or the mailing address recorded in the HIM record file on April 1st, regardless of the reference date of the table.

All Areas—Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

United States—Consists of the 50 States, the District of Columbia, and residence unknown.

Other Outlying Areas—Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County—The primary divisions in most States are counties. In Louisiana, however, divisions are called parishes. Alaska is divided into 21 economic areas, shown here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada, and Virginia. In Puerto Rico, divisions are called municipios.

County Unknown—Persons whose mailing address does not permit identification of county or residence are included in figures for States but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's with one exception: where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and Nonmetropolitan Counties—The division of counties into metropolitan and nonmetropolitan groups is based on the list of Standard Metropolitan Statistical Areas (SMSAs) as published by the Statistical Policy Division under the director of the Office of Management and Budget (see Revised Edition, 1975). Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants, based on the 1970 census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the mailing address in the HIM record file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State Economic Area, which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan State Economic Area. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

SMSA, Metropolitan SEA—See above. Only areas in the United States are listed.
